DETAILED ACTION
EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard Lyon on 09/12/08.

The application has been amended as follows:

Claims 3, 30 and 36-38 have been cancelled.

Claim 1. (Currently Amended) A system for controlling a shared display, comprising:

a general purpose computing device comprising a display device; and a computer program comprising program modules executable by the computing device, comprising,

a plurality of input modules each providing a different communication modality, and which collectively input information from multiple users, and wherein each input module comprises a translation sub-module which takes the user-inputted information input into that input module and converts it into commands or requests that are recognizable to a logic module.

[[a]] the logic module comprising an application which based on the user-inputted information generates display instructions and data, wherein said user-inputted information comprises at least one of video data or audio data or document data,

a layout module which based on the display instructions and data from the logic module generates layout instructions and packages data for display, and

a display module which receives the layout instructions and data from the layout module and employs the same to display content in the shared display on the display device.

Claim 27. (Currently Amended) A computer-implemented process for controlling a shared display on a display device, comprising using a computer to perform the following process actions:

establishing multiple input modalities to input information from multiple users, wherein at least one of the input modalities is characterized by a latency greater than about 1.0 second, and wherein said user-inputted information comprises at least one of video data or audio data or document data; and

inputting the user information from the multiple input modalities to a single computer program which employs the user information to control the content displayed in the shared display on the display device, wherein each input modality translates the user-inputted information input into that input modality and converts it into commands or requests that are recognizable to said single computer program.

Claim 28. (Currently Amended) A system for controlling a shared display, comprising:
a general purpose computing device;
at least one display device showing the shared display; and
a computer program comprising program modules executable by the computing device, comprising,

a plurality of input modules each providing a different input modality at least one of which is characterized by a latency exceeding about 1 second, and which collectively input

information from multiple users, wherein said user-inputted information comprises at least one of video data or audio data or document data,

an application module which receives the user information from the input modules and which based on the information generates display layout instructions and packages data for display, and wherein the application module comprises a sub-module for archiving each unique screen shown on the shared display, and

a display module which receives the layout instructions and data from the application module and employs the information and data to display content in the shared display on the display device.

Claim 35. (Currently Amended) A computer-readable medium having computer-executable instructions for controlling a shared display on a display device, said computer-executable instructions comprising:

establishing multiple input modalities to input information from multiple users, wherein at least one of the input modalities is characterized by a latency greater than about 1.0 second, and wherein said user-inputted information comprises at least one of video data or audio data or document data; ~~and~~

inputting the user information from the multiple input modalities to a single computer program which employs the user information to control the content displayed in the shared display on the display device; and

outputting data from the computer program to a prescribed group of users using one of more of the communication modalities.

Allowable Subject Matter

Claims 1-2, 4-29 and 31-35 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance: Applicant has claimed uniquely distinct features in the instant invention which are not found in the prior art either singularly or in combination. They are a plurality of input modules each providing a different communication modality, and which collectively input information from multiple users, and wherein each input module comprises a translation sub-module which takes the user-inputted information input into that input module and converts it into commands or requests that are recognizable to a logic module, the logic module comprising an application which based on the user-inputted information generates display instructions and data, wherein said user-inputted information comprises at least one of video data or audio data or document data, a layout module which based on the display instructions and data from the logic module generates layout instructions and packages data for display, and a display module which receives the layout instructions and data from the layout module and employs the same to display content in the shared display on the display device. These features are not found or suggested in the prior arts.

The closest prior arts Ho and Salesky disclose a conventional shared display is generated from inputted images for generating and locating pointers associated with certain participants and certain command; either singularly or in combination, fail to anticipate or render the above underline limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure (see PTO-892).
